

The Federal Ministry invites you to the international conference of the EFC Working Party on the Management of Mountain Watersheds (WPMMW)

Integral approach to the flood protection effect of the forest with special consideration of water and sediment retention

Thursday, October 14, 2021

Online via ZOOM

Food and Agriculture
Organization of the
United Nations

The **Austrian Federal Ministry for Agriculture, Regions and Tourism** and the **European Forestry Commission (EFC)** cordially invite you within the scope of the 33rd session of the **Working Party on the Management of Mountain Watersheds (WPMMW)** to this year's conference with international expert contributions.

The Working Party on the Management of Mountain Watersheds is a technical body under the umbrella of the European Forestry Commission (EFC), established in 1950, that promotes sustainable development in mountain watersheds by tackling the many challenges faced in mountain watersheds and ensuring the long-term provision of environmental services by watersheds for both upstream and downstream areas.

At this year's session, the Working Party has put a focus on **forests in mountain watersheds**. All over the world forests in mountainous and steep terrain play an important role providing protection against natural hazards for people, infrastructure and commercial areas. Due to their protective character, forests can prevent avalanches in winter, reduce rockfall and actively reduce shallow landslides through the strengthening effect of the roots. Furthermore, the retentive effect of the forest is particularly important: the forest soil can absorb large amounts of precipitation, acts as a buffer store, delays and thus minimizes the effective run-off and hence can reduce floods, whereby this effect is influenced in many cases by the size of the catchment area, the geology but also the land use. In addition, sediments can be retained by the forest.

This special protective effect of the forest has often a connection to broader topics such as optimal forest management or the availability of safe spaces for living and economic activities. In the framework of this conference, this topic will be extensively discussed, current research results will be presented and national and international experiences will be shown.

We are looking forward to your participation.

The access link (ZOOM) and the final program for the videoconference will be sent to you in due time after your registration!

Please respond by October 8, 2021 at the latest to

Preliminary Program

10:30 Opening Session

Moderation: Florian Rudolf-Miklau (BMLRT/ Directorate III/4 – Torrent and Avalanche Control and Protective Forest Policy)

Welcome and (Keynote) Speeches:

- **Florian Rudolf-Miklau**
Host and Current Chair of the Working Party
- **Hermine Hackl**
FOREST CAMPUS Austria
- **Ewald Rametsteiner**
Food and Agriculture Organization of the United Nations, Forestry Division

11:00 Session 1 – Flood protection function of the forest – Scientific state of knowledge

- **Günter Blöschl**
Technical University of Vienna (TU Vienna), Institute of Hydraulic Engineering and Water Resources Management
- **Gerhard Markart* & Christian Scheidl****
*Federal Forest Research Centre (BFW) of Austria,

Institute of Natural Hazards

**University of Natural Resources and Life Sciences
(BOKU) Vienna, Austria, Institute of Alpine Natural
Hazards

12:30 Lunch break

**13:30 Session 2 – Flood protection in Austrian mountain
watersheds – State of the art**

- **Michael Schiffer**
Austrian Torrent and Avalanche Control (WLV)
- **Matthias Raschka**
Forestry Division of the State of Upper Austria (LFD)
- **Hellen David**
Austrian Federal Forests (ÖBf AG)

15:00 Coffee Break

**15:15 Session 3 – Flood protection in mountain watersheds –
International state of the art**

- **Enrico Pompei**
Italy - Ministry of Agriculture and Forestry, Direttore
DIFOR II
- **Marc Pons**
Andorra Research + Innovation
- **Laurent Bélanger**
France - National Office of Forests (ONF), Directorate of
forests and natural hazards
- **Hideaki Marui**
Japan - Niigata University

17:00 End of the conference
